## REMIXME: New digital music format lets you experience every music track anew

Herpers Publishing International presents a new digital music format that enables every listener to intervene in the mix of the music track.

REMIXME allows access to five individual instrument groups of a song and can set priorities without making the song sound bad. Drums, bass, instruments, vocals and background vocals can be switched on or off individually during the song, or their volume can be changed.

Each song becomes an individual experience. You can switch off the voices or turn them down so you can sing along yourself, or you can turn off the guitars to play along with the pure singing of your artist.

The art of the individual musicians in music track is therefore much more in the focus of the listener and fan. With a click on the SOLO button you can switch off all other instruments and concentrate only on the individual musician.

The REMIXME Mixing Console has been programmed to be easy to understand. The original mix of the song always remains in the foreground and can never be changed beyond recognition.

The creator of the format and programmer of the apps, York-Patrick Herpers, uses his own music productions to demonstrate the various app formats "Single", "Maxis Single" and "Album". All three formats can be downloaded for free from the Apple App Store, Google Play and Amazon Apps.

# Press Release

2020/09/14

The REMIXME format can be generated by any music production in premastering in just a few steps. Using the existing cover, an individual app is created that offers artists and music companies a new form of marketing.

To York-Patrick Herpers:

Before founding Herpers Publishing International (2005), he worked as a new media consultant for the German music industry. Sonopress GmbH, PhonoNet GmbH, Warner Music Germany and edel AG were among his biggest customers. His developments include scanner stations for large trading houses, the Music Promotion Network and Vendor Managed Inventory Systems. As an author and publisher, he developed board game books, educational comics and folding coloring books, among other things. He has lived on the Costa Blanca in southern Spain since 2017 and sells his developments worldwide in more than 6 languages.
